

TRIM WET

Our Machines Do Both!

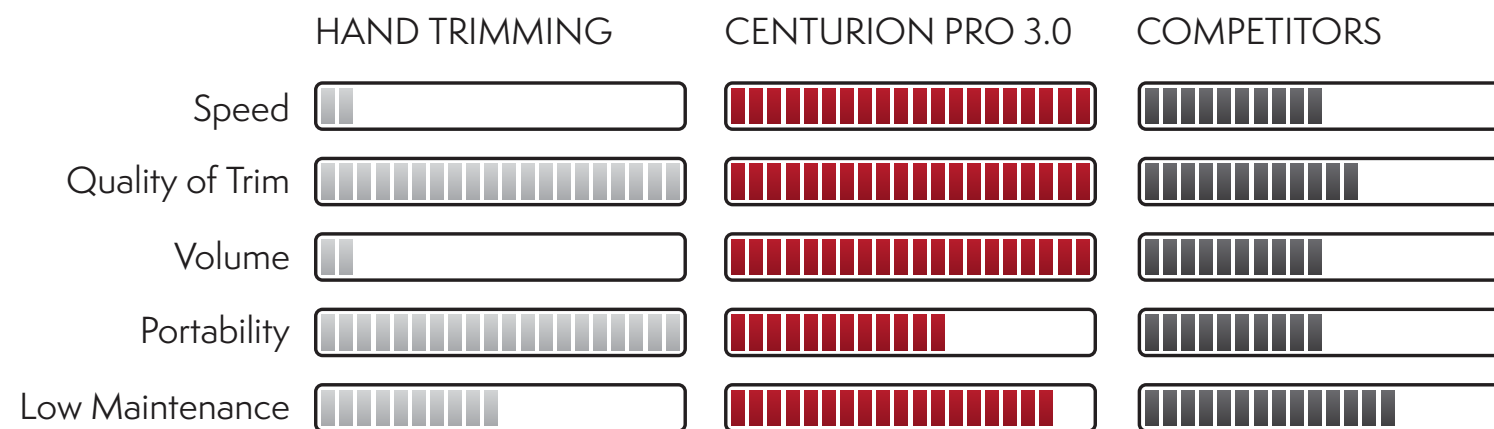

TRIM DRY

All CenturionPro Trimming Machines Now Come All Inclusive with BOTH WET and DRY Tumblers!!!

CENTURIONPRO is committed to grow with your business

CenturionPro automated trimmers have a simplistic design to offer unsurpassed quality and the best performance in the industry. When compared to any other competitive machines on the market, our trimmers are proven to have more cutting surface area in their class and greater CFM output due to our high horsepower blowers. Our machines harvest more than any other machine on the market – and at a more economical price. There really is no comparison! CenturionPro trimmers not only save costs by requiring less labor to run and maintain, but our more affordable price point results in a stronger ROI for our customers.

COMPARE

UNSURPASSED QUALITY

MEDICAL GRADE DURABILITY

The body and main components of the CenturionPro 3.0 are composed entirely of medical grade Anodized Aluminum and Stainless Steel. These machines are built to withstand being moved around, repeated cleaning and prolonged use with zero issues.

HARDENED STEEL CUTTING REEL

Every machine features a Toro hardened steel cutting reel with high quality blades. Additionally, our magnetic blade technology ensures a consistently sharp blade and the cleanest cut in the industry.

TRIPLE-BAG SYSTEM

Any product that makes it through the trim saver is collected by our triple-bag system. This system is designed for cleanliness, as well as trim and keif collection so you don't waste any of your precious product for further use.

SIMPLISTIC DESIGN

EASY TO SET UP/TEAR DOWN

This machine requires only 10-20 minutes for set-up and take down to leave you time for more important things.

EASY TO MAINTAIN & CLEAN

We build our machines to be extremely simple with less moving components. This makes them easy to maintain and even fix if anything ever goes wrong. All our machines can be quickly cleaned with a pressure washer in 10-20 minutes.

BEST PERFORMANCE IN THE INDUSTRY

HIGH PROCESSING CAPACITY

The processing capacity of 3.0 is a gargantuan 52-60 lbs/hr dry and 260-300 lbs/hr wet right out of the box with having to add more machines. As a result, this machine can replace up to 75 human trimmers without sacrificing quality.

FINELY TUNED DIVERTER

Ensure the preservation of different strains and densities with our unique diverter that allows you to fine tune air flow and cut during the trimming process.

UPGRADE TO QUANTANIUM TO ACHIEVE 40% GREATER TRICHOME PRESERVATION

The tumblers on each CenturionPro machine, are made of a rugged, 16 gauge, 304 stainless steel, not aluminum. Larger tumbler diameter ensures that our trimmers will produce more than any other machine on the market.

Our Quantanium Coated Tumblers delicately handle flowers and give 40% greater trichome preservation. This technology prevents precious trichomes from adhering to the tumbler surface without the need for special lubricants or sprays.

Food Grade
Direct Feed Hopper

Quality Control
Conveyor

The 3.0 medical grade trimmer system comes standard with a high quality food grade hopper. This component is made of food grade plastic and is designed to handle large amounts of material, therefore meeting the needs of all commercial producers worldwide. Simply place the plant material in the top tray and work it down into the triple-barrel system for trimming, as needed.

The extra-wide belt conveyor system provides the user with total control over the finished product – hour after hour. In addition, this quality control conveyor allows you to monitor the final trim of your flowers and apply touch ups, if needed.

The Quality Control Conveyor is available as an add-on.

THE MOST CUTTING POWER
THE LARGEST COMBINED CUTTING SURFACE AVAILABLE IN THE INDUSTRY

The 3.0 features the CenturionPro side-by-side cutting technology with 3 x 26" cutting reels that equals **78" of total cutting surface** and **140,000 cuts per minute**.

26" x 3 = **78"**
of total cutting surface in **1** machine
FOR **\$22,995**

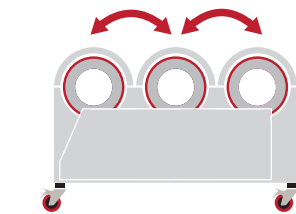

NEAREST COMPETITOR

21" x 4 = **84"**
of total cutting surface in **4** machines
FOR **\$50k +**

INDUSTRIAL CAPACITY

At CenturionPro Solutions, we believe in having our tumblers side-by-side, not back-to-back in order to prevent extended lengths of time that your product is traveling through the machine. Higher quality cutting components and vacuums ensure your product is trimmed in less than half the time of what the other guys recommend.

Less Tumbler Travel & Less Agitation = **Better Quality!!**

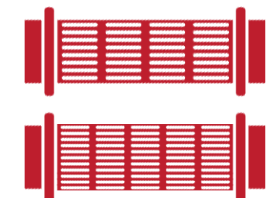

BEST WARRANTY IN THE INDUSTRY

At CenturionPro, we know of the problems associated with downtime and the importance of tight time-lines when it comes to the harvesting process. This is why all of our trimmers are backed by a 10-year warranty. Our knowledge, experience and technology will keep you up and running smoothly for decades to come.

Trust us, we got your back!!
